Problem Log

November 30, 2015

1 Project Problems

1. Didn't know anything about mapping software, didn't know which to use

2. The one I'm using is a two parter (mapbox + leaflet)

3. Trying to find a direction service

   (a) mapbox limit of 12, didn't know how to use geojson, no docs really

   (b) leaflet routing machine, low api call limit, lots of extra features I didn't want - had to remove

   (c) When finally got L.Routing, lots was already built so I had to rebuild a lot of the RCP

4. Didn't full read spec and there was a few extra features I needed to add that I missed - including adding video/image/links, which was a big thing

5. Exams much earlier

Other apps to look at later;
